

Removing windows in one go – FEIN construction cutter.

Clean, quick, no damage and not too much dust or time-consuming rework – removing old windows no longer brings with it unpleasant side effects: The FEIN construction cutter MF 12-180 with special diamond wheel uses just one powerful cut to cut through plaster, masonry, cement, tiles and metal bracings. Cut with minimum distance to the old window frame, parallel to the outer wall. Dust is sucked off effectively and collected in a closed carriage. The great benefit: you can work very quickly with very low tool costs.

In brief: once you've worked with a FEIN construction cutter, you will never want to return to labouring with a sabre saw, angle grinder or chisel. The FEIN construction cutter is also suited for dust-free cuts through tiles, natural stone flooring and stair slabs.

The ideal addition to the construction cutter and the recommended tool for cutting window frames is the FEIN SUPERCUT CONSTRUCTION.

Construction cutter

MF 12-180

Extremely powerful and robust construction cutter for dismantling old windows.

Technical data

Model	MF 12-180	
Input	W	1200
Output	W	750
Speed, no load	R.P.M	7000
Cable with plug	m	4
Weight	kg	4,1
Diamond wheel Ø	mm	180
Cutting depth	mm	0 - 50
Order Reference	7 238 12	

Included in price

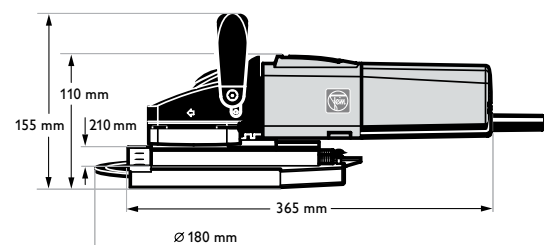

1 metal tool case, 1 diamond wheel, Ø 180 mm

FEIN BENEFITS
