

Clean finish: FEIN DUSTEX.

Dust extractors from the FEIN DUSTEX range are the ideal solution for minimising dust when working with power tools in industrial settings, in the workshop, or for assembly jobs. The convenient automatic on/off function switches these professional and exceptionally quiet wet/dry dust extractors on and off via the switch on the connected power tool. FEIN DUSTEX dust extractors also feature a soft start function which reduces the start-up current to avoid unnecessarily tripping lower rated fuses. The dust extractors are supplied with an extra-long power cable and a suction hose, giving the user maximum range and flexibility.

Vacuum cleaners

- DUSTEX 25** Compact wet and dry extractor for connecting power tools when working in the workshop and for assembly work.
- DUSTEX 40** Powerful wet and dry extractor for connecting power tools when working in the workshop and for assembly work.
